

Waterplus

Scheme of charges

How we calculate your bills

From April 2025

(Until otherwise stated)

About this document

Water Plus Limited Scheme of Charges (applicable for all wholesale regions excluding Severn Trent and United Utilities) from 1 April 2025.

Our Scheme of Charges explains how we calculate your bill and how different charges apply to you.

This document is split into three parts:

- **The first part (A)** provides an overview of billing, along with contact details and other useful information.
- **The second part (B)** provides a description of how we calculate your retail charges.
- **The third part I** establishes how to find your relevant wholesale charging.

Customer information

Customers planning to move to a different property, will be provided on request with information regarding the charges for that property, subject to any consent that may be required from the current occupier of the property. Information will also be provided on any options and alternatives for charges that may be available.

Changes to the Scheme of Charges

If there is a change in Relevant Laws or Regulatory Guidance that has an impact on this Scheme of Charges, or if there are any changes that impact this Scheme of Charges, we may amend this Scheme of Charges as a result.

Any questions?

If you have a question about any aspect of this document, take a look at our Frequently Asked Questions section on our website [water-plus.co.uk](https://www.water-plus.co.uk) or call us, using the contact details in section A1.7.

A: General overview

A1 Overview

- (i) Unless defined in this section A1, words used in this Scheme of Charges have the same meaning as under the Interpretation Act 1978 as applied to the interpretation of an Act of Parliament.
- (ii) Clause and sub-clause headings are for convenience only and shall not affect the interpretation of this Scheme of Charges.
- (iii) In this Scheme, unless the context requires a different interpretation:

The Act – the Water Industry Act 1991 (as amended from time to time).

Assessed volume charge – applies when a meter cannot be installed, no charging value for the premises is available or where a charging value exists and the wholesaler has deemed it inappropriate.

Billing agent – a person(s) or company with valid written authority from a customer to act on their behalf in relation to our water and/ or wastewater services charges. The customer remains liable for charges.

Business rateable value – a rateable value in a list maintained under section 41 (local rating lists) or 52 (central rating lists) of the Local Government Finance Act 1988.

Capacity charge – the charges applicable to a non-household customer for the capacity element of a standby supply, based on the notified volume.

CCW – the Consumer Council for Water, a statutory consumer body for the water industry in England and Wales, established under Section 27A of the Water Industry Act 1991.

Chargeable area – for surface water drainage this is the total site area of premises including the boundary and all land held within that boundary but excludes any permanently grassed, cultivated or landscaped areas where no surface water or groundwater drains either directly or indirectly to a public sewer.

Charging value – the rateable value or a charging value assessed by the wholesaler (based on either a rateable value or a business rateable value where rateable value is not appropriate), or a charge assessed by the wholesaler for charging purposes.

Charging year – the period of one year commencing on 1st April.

Charging zone – one of the ten geographical areas within the region designated as being served by Severn Trent pursuant to their Instrument of Appointment, detailed further in section A3.1.

Community group – for surface water drainage charges, this is a group which provides benefit to the local community and meets criteria as determined by the wholesaler.

Competent authority – any body or organisation, including government department and regulatory, statutory and other entity, committee, or ombudsman that has a relevant regulatory or supervisory role including the Water Services Regulation Authority (Ofwat), the Department for Environment, Food & Rural Affairs, the Drinking Water Inspectorate, the Environment Agency, the Health and Safety Executive and Market Operator Services Limited.

The Company – Water Plus Limited.

Connection – a connection to the wholesaler's network regulated by the Act and other relevant legislation through which you receive the benefit of one of our services.

Customer – a person for or to whom we provide services or who applies to become such a person and who is liable to pay charges for our services (see sections 150B and 219 of the Act).

Domestic sewage – the contents of toilets, water which has been used for cooking or washing, and surface water but not including water used for the business of a laundry or for a business preparing food or drink for consumption otherwise than on the premises (see section 117 of the Act).

Fittings regulations – the Water Supply (Water Fittings) Regulations 1999.

Furnished – containing furniture or sufficient fixtures and fittings that allows immediate use or used for storage purposes.

Gap site – a non-household customer's premises which is in receipt of water and/or sewerage services but where no supply points or insufficient supply points are registered in the market.

Gap site allocation process – the process of allocating identified gap sites to water retail companies, as detailed in the relevant laws.

Guaranteed standards scheme (GSS) – a series of guaranteed minimum standards of service a non-household customer is entitled to receive from its water retail company, that requires specified payments to be made to affected non-household customers if the minimum standard is not met.

Highway drainage - is water which drains from streets and roads into a public sewer.

Interim duty tariff – most appropriate tariff where we have an interim duty under section 63AC of the Act to continue the supply of water to premises which was previously made by a licensed water supplier.

Intermediate volume user – a non-household customer who:

For water receives between 10,000m³ and 49,999m³ of potable water per year from the Severn Trent wholesale supply, for wastewater discharges between 10,000m³ and 49,999m³ of chargeable sewerage per year and/ or for Trade Effluent discharges between 10,000m³ and 49,999m³ of chargeable effluent per year.

Large volume user - a non-household customer who:

For water receives 50,000m³ or more of potable water per year from the Severn Trent wholesale supply, for wastewater discharges 50,000m³ or more of chargeable sewerage per year and/ or for Trade Effluent discharges 50,000m³ or more chargeable effluent per year.

Letter of authority – written confirmation from a non-household customer, confirming:

- (a) the named third party is acting on their behalf;
- (b) the extent of the third party's authority; and
- (c) how the third party's fees are being paid.

Where the non-household customer has less than ten employees, the written confirmation shall be in the form of a template issued by Ofwat.

Licensed water supplier – a company which is the holder of a water supply licence (see section 17B(9) of the Act).

Meter – the water undertaker's meter

Meter reading – a reading of a water meter to determine consumption or in the absence of such reading our estimate of consumption.

Meters regulations – The Water (Meters) Regulations 1988.

Non-household customer – a person who is the occupier of premises other than a house or who we have identified as being responsible for water services charges provided to the occupier. For example, this includes all charges that relate to the provision of one-off or discrete services.

Notification – the provision of information relating to a change of a charging value, any other change affecting charging, or other relevant information (including details of any change to a rateable value or business rateable value) necessary to verify and support that change.

Occupier – any person in actual occupation of the premises, or any

person who:

- owns the premises; or
- has sufficient control over the premises to put them under a duty of care towards lawful visitors; or
- maintains premises used or intended for use as a dwelling or non-household premises furnished and ready for occupation; or
- maintains premises for occupation (including multiple occupation) with shared facilities or as holiday, student, hostel or other accommodation for short term occupation (whether let wholly or in part), usually for less than 12 months; or
- develops or owns any new premises that are empty or unfurnished.

See also definition for customer

Ofwat – the Water Services Regulation Authority, responsible for the regulation of the water and sewerage industry in England and Wales, established by section 1A of the Water Industry Act 1991.

Potable water – water fit for supply for domestic or food production purposes.

Premises – includes any building or part of a building which is separately occupied or intended to be occupied and land or an interest in land.

Private water supply – a supply of water that is neither from a water supply currently owned and/or operated by us, nor another licensed water supplier.

Rateable value – the value of premises designated by the wholesaler, often based on a list maintained under section 41 (local rating lists), 52 (central rating lists) of the Local Government Finance Act 1988 or the official valuation list (for the purposes of the General Rate Act 1967) on 31 March 1990.

Regulatory guidance – means guidance from a Competent Authority.

Relevant laws – means:

- (a) any statute, regulation, bylaw, ordinance or subordinate legislation which is in force for the time being or which may be introduced from time to time to which you or we are subject;
- (b) the common law as applicable to you or us;
- (c) any binding court order, judgment or decree applicable to you or us;

- (d) any binding order, decision, determination or direction of a Competent Authority which applies generally or applies to you or us in respect of your or our rights or obligations relating to the Scheme of Charges;
- (e) any and all relevant licences, consents or permissions from a Competent Authority; and
- (f) any applicable industry code, policy, guidance, standard or accreditation terms enforceable by law or Regulatory Guidance, in all cases relevant for England and Wales.

Services – any service provided by us related to water supply and/ or sewerage services.

Sewerage – for the purposes of this scheme, sewerage consists of all services related to the wholesale sewerage network which includes wastewater, surface water drainage, highway drainage and trade effluent.

Sewerage charge – a charge due for any service relating to the sewerage network of the wholesaler.

Sewerage services – any services provided by us related to the provision, alteration or disconnection of sewerage and the reception, conveyance and treatment of sewage.

Site – premises in the same curtilage or adjoining each other receiving the benefit of our services, occupied and operated as a single economic unit.

Substantially altered – a site or premises which are substantially physically altered, including being subjected to a material change of use, split into different and separate occupations, merged with other premises, partially demolished, or otherwise altered in such a manner that the recorded charging value is in the wholesaler's opinion no longer appropriate; "substantial alteration" will be interpreted accordingly.

Surface water drainage – collection of rainwater that falls on premises and then drains directly or otherwise to public sewers.

Trade effluent – any liquid, either with or without particles of matter in suspension in it, which is wholly or in part produced in the course of any trade or industry carried on at trade premises, but not including domestic sewage (see section 141 of the Act)

Trade effluent consent – a consent of the type described in section 118 of the Water Industry Act 1991 including, for the avoidance of doubt, temporary or time limited consents or letters of authorisation and consents in relation to low risk discharges.

Transitional scheme – a scheme relating to a notional band within surface water drainage to allow previously under charged properties to be smoothly transitioned to the correct pricing band.

Vacant – premises are considered to be vacant if **all** of the following criteria are met:

- (a) there is no physical occupation by any person, for any purpose, other than for the sole purpose of providing security services for the premises;
- (b) the premises is not open or available to the public or visitors;
- (c) there is no stock left in the premises, except where these items have been abandoned by a former tenant and the premises is not in use;
- (d) there are no moveable items left on the premises such as furniture, equipment, tools or moveable equipment or machinery; and
- (e) any fixtures and fittings have been abandoned by a former tenant and the premises is not in use.
- (f) There is no recorded consumption on the meter

A property that is prohibited by law from being occupied, for example an unsafe property, is also considered to be a vacant premises.

Wastewater – for the purposes of this scheme, wastewater consists of both domestic sewage and trade effluent but excludes surface water drainage.

Water and sewerage undertaker – the company appointed to carry out water and/or sewerage duties under the Water Industry Act 1991. Also referred to as water undertaker or wastewater undertaker.

Water services charges – a charge or any combination of charges for water supply services or sewerage services or both.

Water supply – water supplied by us to a non- household customer.

Water supply services – any services provided by us related to the provision, alteration or disconnection of a water supply.

We, us or our – the Company or our representative(s).

Wholesale Charges – the charges which the wholesale supplier for water and sewerage services within the region applies in accordance with its tariff document.

You, your – a non-household customer.

A1.1 How we charge you

There are **three ways** we charge for the water and sewerage services we provide:

- **Measured**
- **Unmeasured**
- **Assessed**

Whichever of these methods applies to you, the charges cover up to **five elements**

- **Water supply** – this covers the costs of supplying clean water to your property.
- **Wastewater** – this covers the cost of removing, treating and/or disposing of the wastewater from your property
- **Surface Water Drainage** – this covers the cost of draining rainwater from your property. If no rainwater from your property drains to the public sewer then you will not have to pay this charge.
- **Highway Drainage** – this covers the cost of draining water from the public highways
- **Trade effluent charges** – if your wastewater discharge contains more than just a domestic type of effluent, we will charge you according to the strength of the effluent. For more information, see section B5. Our current rates are set out in tables 13 to 16 in section C.

A1.2 VAT

We apply VAT to charges for water we supply to non-household customers whose main business activity is covered by divisions 1 to 5 of the Standard Industrial Classification (SIC) list. The sectors covered by these classifications are:

- Chemicals
- Construction
- Engineering
- Manufacturing
- Mining
- Textiles
- Utilities

Charges for sewerage services and for water supplied to non-household customers whose main business activities are outside the relevant SIC classifications are zero-rated for VAT.

A1.3 Why we can charge

Our charges are payable under the deemed contract that is formed between you and Water Plus Limited by you accepting the provision of water and/or sewerage services at your premises or under any contract that we have otherwise expressly agreed with you.

Where we have an interim duty under section 63AC of the Act to continue the supply of water to premises previously supplied by a licensed water supplier, charges will be based on the interim duty tariff, as appropriate.

Where a site is allocated to us under the gap site allocation process, the charges contained within this document will apply.

A1.4 Charging and payment arrangements

A1.4.1 Liability for charges

The owner or occupier of the premises is liable for charges except where another person, other than a billing agent, has agreed with us to accept responsibility.

In most owner and occupier situations, it is normally the occupier who is charged and not the owner. Exceptions include holiday lets and some bedsits and student accommodation as well as other short-term accommodation where the occupation of the tenants is temporary. In these cases, the owner will usually be charged. If no occupier can be identified, the owner will be liable for the charges.

Where multiple premises are supplied by a single metered water supply, we reserve the right to regard the occupier of one set of premises as the occupier of all the premises served. This will occur when both the site area and consumption of all but one of those premises is, in our opinion, insignificant in relation to the total of the combined premises.

If you take on the services of a third party to act as your billing agent, we will require a written Letter of Authority from you, before making and recovering charges through your billing agent. If there are any additional dealings between us and your billing agent, the Letter of Authority must detail the authority to partake in such dealings on your behalf. Any Letter of Authority must have been signed and currently active (i.e. has not expired). The involvement of a billing agent does not affect your liability for charges.

If a site becomes vacant, you must provide us with 30 days notice to ensure no charges for consumption are applied from the date on which the site became vacant. If a wholesaler continues to apply any charges relating to the site, then these will be passed on to the occupier or owner as appropriate.

Please note, if consumption continues to be recorded at the site following the vacancy date, further consumption charges may apply.

A1.4.2 Timing of payment

All charges are payable as stated on your bill and/or your contract. If you do not pay on time it will result in recovery action and you may need to pay additional costs because of this (see section B6).

Unmeasured charges are due in advance, and can be paid annually, or in half yearly, quarterly or monthly instalments. If you choose to pay by instalments and you do not pay on time, then all outstanding charges on your account become due immediately.

Measured charges are payable on demand as stated on the bill. By agreement, we may allow you to pay your charges on a payment plan.

We reserve the right to re-assess and amend the payment schedule and/or payment method where your circumstances change. This will include (but is not limited to) your credit rating. We also reserve the right to re-assess and amend the payment schedule and/or payment method where you do not make payments by their due dates.

In the event of a formal insolvency procedure, all fixed and unmeasured charges will be apportioned on a daily basis. Any apportioned charges after the insolvency date will be payable by the occupier of the premises in question and fall due on the next day of occupation after the insolvency date. Any such apportioned charges will not fall within the insolvency procedure. The charges will be calculated according to the basis of charge that was applicable on the insolvency date.

If your sewerage charges are collected by another water company on our behalf, the charges will be payable in accordance with their payments schedule.

A1.4.3 Security deposits

We may require you to provide a security deposit for payment of future charges.

Interest will be payable on deposits at a rate determined us. The value of the security deposit can be up to the equivalent value of your annual charges for water and sewerage services (including trade effluent).

A1.4.4 Interest on outstanding charges and late payment charge

We may require you to pay interest on overdue accounts; this will be calculated at the rate detailed in your Water Plus contract. If you are on a Water Plus Deemed Contract, you can find your terms and conditions [here](#).

We may also charge you an administration charge for payments that have not been received on time (see section B6).

A1.4.5 Legal services charge

We reserve the right to charge you for the costs we incur when we use legal services to recover outstanding water services charges, or any other charge referred to in this Scheme of Charges.

A1.4.6 Pre-payment devices

We may, where appropriate, install a pre-payment device at premises except those described in schedule 4A of the Act.

A1.4.7 Billing adjustments

Whilst we make every effort to make sure that all bills are correct, in the case of error we reserve the right to make retrospective adjustments. Any amendments will be made in line with the relevant Wholesaler policy or decision.

We reserve the right to make retrospective adjustments where access to install, exchange or read the meter has been prevented or refused, or information has been incorrectly provided or withheld that may affect your charges.

If your charges are based on Business Rateable Value (see sections A3 and B3), and there is a change to this value, you may apply for the charge to be recalculated. Where the wholesaler determines that your Rateable Value has changed, your future charges will be adjusted.

Where a recalculation of charges has resulted in a refund being due (based on the difference between what has been paid by the customer and the newly calculated charges for both wholesale and retail charges) the refund will be made via a credit adjustment to the customer's account.

We reserve the right to recover from you or your agent any costs that we have reasonably incurred in investigating claims associated with our charging mechanisms, where we subsequently establish that the charges under review were correct.

A1.4.8 Group billing arrangements

We may agree to group billing arrangements for owners of multiple premises upon request.

A1.4.9 Billing frequency

We reserve the right to change the billing frequency and we will ensure appropriate and timely information is provided when this occurs.

A1.5 Payment

Payments may be made:

- by direct debit (at no extra charge). You can set up a direct debit online at: water-plus.co.uk
- by debit or credit card by ringing: **0345 072 6072**;
- by cash at a PayPoint outlet (at no extra charge). Take your bill or Watercard and cash payment to a PayPoint store;
- over the counter of any bank. Cheques should be made payable to Water Plus Limited. Service is free if you pay by cheque at any branch of Natwest and may be free if you pay at your own bank. Some banks may charge for this service;
- at a Building Society (ask your own society for details);
- by post to the address on your bill;
- by internet banking, using e-payment facilities of your bank or building society
- electronically via our website: water-plus.co.uk

None of these organisations referred to above acts as our agent.

We will make a charge for dishonoured payments.

A1.6 What to do if you are unhappy with our service

We aim to deliver a high standard of service and to deal with your complaint speedily and satisfactorily. If you feel we have not met these standards, please contact us using the contact details in section A1.7.

According to the Water Plus complaints handling process, we should reply to any written complaint within 10 working days.

If we fail to do this, you may be entitled to an automatic payment under the statutory Guaranteed Standards Scheme. This forms part of our standards of service that have been agreed with Ofwat.

If, following correspondence with us, you remain unhappy with the outcome of your complaint you can refer your complaint to: C-W - The Consumer Council for Water, 1st Floor, Victoria Square House, Victoria Square, Birmingham B2 4AJ.

After your complaint has been through our complaints procedure and has been considered by CCW, if you remain unhappy with the outcome of your complaint you may be eligible to take your concerns to our water redress scheme.

You can find out more information about our complaints procedure, including details of our current water redress scheme, by accessing our website at: water-plus.co.uk/complaints

A1.7 Useful contact numbers and addresses

General customer enquiries and requests

Website: water-plus.co.uk

Email: service@water-plus.co.uk

For specific queries, please see our website for further contact details.

Call: **0345 072 6072** for all customer enquiries.

Business address: Water Plus, Prospect House, Trentham Lakes North, Gordon Banks Drive, Stoke-on-Trent ST4 4TW.

Write to us at – Correspondence: **WaterPlus Correspondence, PO Box 337, Sheffield, S98 1BZ.**

Payments: **Water Plus Payments, PO Box 336, Sheffield, S98 1DY** or email to:

Paymentservices@water-plus.co.uk

Office hours: 8:30 am to 5:30pm Monday to Friday (excluding English bank holidays and company holidays, see our website for more details).

Emergencies and queries on water quality, pressure, supply, sewerage or leaks

During office hours call: 0345 072 6072 as above.

Outside office hours: (emergency only).

Contact the wholesaler emergency line, these can be found on our website or below.

Complaints

Call: **0800 316 2126** to speak to our complaints team.

Please visit the following page for the Water Plus complaints handling process:

water-plus.co.uk/complaints

Address: See "Correspondence" address above.

Other useful contacts

Ofwat email: mailbox@ofwat.gov.uk

Telephone: **0121 644 7500**

Website: ofwat.gov.uk

Consumer Council for Water

Email: enquiries@ccwater.org.uk Telephone (Customers in England): **0300 034 2222.**

Website: ccwater.org.uk

A6 Other information

A6.1 Leakage allowances

On measured premises, where a leak is found an allowance may be available to adjust the charges payable, this allowance will be in line with the wholesaler's policy and must satisfy their criteria.

If you have a leak and feel you are entitled to an allowance, please contact us, and we will contact the water undertaker on your behalf.

A6.2 Water meter

It is an offence to tamper with or remove a water meter without permission, see section 175 and 176 of the Act. You will be liable for additional charges if a meter is tampered with (see section B6).

A6.3 Water meter testing

You can request that the water meter is tested in accordance with regulation 6 of the Meters Regulations, and we will contact the water undertaker to arrange this test. We reserve the right to charge an administration charge for arranging water meter accuracy tests.

The water meter will be removed for testing. A charge for the test will apply if it shows that the accuracy of the water meter falls within the prescribed limits of error. No charge remains payable to the water undertaker if the meter accuracy fails the prescribed limits of error.

If the test shows the water meter is registering incorrectly, we will adjust your charges in accordance with regulations 8 and 9 of the Meters Regulations.

A6.3.1 Change in water meter size or position

Upon you or your agent's request we will contact the water undertaker on your behalf to:

- carry out a survey to confirm if a water meter can be repositioned in accordance with regulation 5 of the Meters Regulations; or
- carry out a survey to assess your likely water requirements and whether the existing
- water meter is of the appropriate size; or
- fit and remove a data logger where possible; or
- reposition the water meter or replace it with one of the appropriate size.

All such work will be at your expense.

If you request us to replace the water meter with one of a different size without a survey as above, and that requested size is proved to be

inappropriate, you will be required to pay for any necessary further works.

A6.3.2 General site visit charge relating to metering

If a visit has been requested in relation to carrying out work on a meter and it is determined that no work is required, you will be charged for any resulting costs (see section B6).

A6.3.3 Access to a water meter

You must allow access to the water meter at all reasonable times. If you fail to allow reasonable access to read or maintain a water meter it may result in legal proceedings (see sections 162 and 172 of the Act) and you may be liable for any costs incurred, including associated legal costs. This also includes any costs associated with accessing or re-siting a covered or obstructed meter (see section B6).

A6.4 Disconnection and reconnection charges

A6.4.1 Arising from non-payment

Where we arrange for a site visit to take place to disconnect a supply for non-payment of charges in accordance with section 61 of the Act, a charge will be payable, and an additional charge will apply for each subsequent visit.

Where a supply is disconnected for non-payment of charges, the supply will not be reconnected until all outstanding water and service charges and an additional charge for reconnection have been paid.

Where premises have been deemed to have been illegally reconnected, we reserve the right to charge for each subsequent visit to re-disconnect the supply.

We may require security to be provided for future payment of charges if you fail to pay and are subsequently disconnected.

Where our representative or agent visits premises to disconnect the supply as above and the disconnection does not go ahead, a charge for the visit may be payable.

A6.4.2 Permanent disconnection

Charges will be applied for disconnections as per our non-primary charging policy, see section B6.

A6.4.3 Temporary disconnection

If you have an unmeasured water supply, you may request that the supply is temporarily disconnected provided the premises has a separate service pipe and this can be done without affecting supplies to other properties. We reserve the right to charge for this.

Charges for surface water drainage and highway drainage services remain payable.

We reserve the right to make a charge for reconnection following temporary disconnection (see section B6).

A6.4.4 Reconnection following disconnection for non-compliance with the fittings regulations

Where a water supply has been disconnected for non-compliance with the Fittings Regulations and you request reconnection, we will charge you for reconnection. There will be additional charges applied to your account for the disconnection and reconnection work (see section B6).

A6.5 Other water supply charges

A6.5.1 Charges for water used for improvements to existing premises

In the case of improvements to existing premises that are unoccupied, full charges continue to be due at the appropriate unmeasured or measured rate where the premises receives the benefit of services.

A6.5.2 Inspection of plumbing work

Where an inspection is required at premises to confirm that plumbing works comply with the Fittings Regulations, there is no charge for initial inspections. If works do not comply with the Regulations, we will make a charge for each necessary re-inspection visit (see section B6).

We will also make a charge where you request a visit to:

- locate a stop tap or stop valve for work on private pipework; or
- provide advice about or assistance with private pipework; or
- carry out a pressure/flow test (see section B6).

B: Charges description

B1 Introduction

B1.1 Context

This Scheme of Charges contains the charges of Water Plus Limited and applies from 1st April 2025. It is our description of the methodologies used in calculating our charges.

B1.2 General principles

This Scheme of Charges fixes the charges for the services or facilities provided by us and in connection with the following:

- the supply of water (apart from the supply of water in bulk);
- the provision of both sewerage and sewage disposal services; and
- the provision of drainage services; and
- the conveyance, reception and treatment of trade effluent discharged under a trade effluent consent.

This Scheme of Charges applies to eligible non- household premises as determined by Ofwat's eligibility guidance.

Our charges are based on the Wholesale Charging applied by the relevant Wholesaler for your area, with an additional Retail element applied in line with the pricing controls established by the regulator.

The specific charges you pay will be established based on the consumption banding of all your sites collectively, with the previous year's consumption used to assign you to one of three consumption profiles (see section B2). In addition to the specific wholesale charges of the relevant wholesalers, a Retail Fee element will be added to your bills as detailed in Table 1 for each service provided (Water and waste water / Drainage).

If you are a non-household customer and we have entered into a written agreement with you, if there is any conflict between the terms of the agreement and this Scheme, the terms of the agreement will continue to apply.

We apply the charges contained in this Scheme of Charges and any taxes imposed by law on these charges shall be recoverable by us.

B2 Consumption Banding

From the 1 of April 2023, the way you are being charged is changing. Following guidance from Ofwat, the tariffs you are charged will now be dependent on your level of consumption as a customer.

The tariffs we charge you are set in line with the pricing controls established by Ofwat, which distinguishes between three customer volumetric profiles. These are 0 – 500m³, 500 – 50,000m³ or 50,000+m³. For each charging element, a separate tariff has been published for each of these groups and you will be charged in line with your consumption banding .

For customers in group 1, you will now see a separate fixed charge for each service you receive (water and wastewater / drainage), detailed in Table 1 of section C.

Your consumption banding for charging purposes is based on your previous consumption across all your sites collectively, using the previous calendar year of consumption data for each site and aggregated.

B3 Miscellaneous Charging Policy and Allowances

Water Plus will apply charging to your site in line with the wholesale charges applied to your site by the relevant wholesaler. For the avoidance of doubt, any amendments to charging or provision of allowances will only be provided subject to the discretion of the relevant wholesale entity.

B3.1 Water meter reading

The meter reading is evidence of consumption.

Your water meter will be read at specific intervals throughout the year, and bills are normally based on the actual usage shown on the water meter. If we cannot read the water meter during a billing period, we may ask you to provide a meter reading.

Where no meter reading has been obtained, usage will be estimated based on previous consumption (or assumed usage for any period prior to meter installation or where there is no record of previous consumption).

In the unlikely event that a meter stops recording consumption or fails to register correctly; we will estimate usage based on the most reliable data available. Estimates may be adjusted later if necessary.

Charges will be apportioned and billed on a pro-rata basis between the current and previous charging year for the first meter reading taken after 1 April 2025.

B3.2 Temporary discharges

For any temporary discharge to a public sewer or sewage disposal works, an appropriate charge will be made, which will be based on wholesaler charges with an additional administration fee.

B3.3 Chargeable area for measured premises

For charging purposes, your premises may be allocated to a site area charging band based on the chargeable area and charging policy of the relevant wholesaler, including the potential allocation of any common areas as described below.

Where there is a common area (internal or external) belonging to more than one separately occupied premises or buildings in multiple occupation, the sewerage undertaker may determine each chargeable area for each site in line with their policy.

We reserve the right to recover from you or your agent, any costs that have been reasonably incurred in cases where you or your agent dispute either the site area charging band to which your premises have been allocated or seek to demonstrate that your premises does not drain any surface water or groundwater either directly or indirectly to the sewerage undertaker's sewer, and it is subsequently demonstrated that our original assessment of your premises was correct (see section B4).

You must provide us with notification of any change that may affect the site area charging band that has been given to your premises.

Once a change is confirmed by the sewerage undertaker, we will apply any resulting adjustment in line with the Wholesaler decision and policy.

We reserve the right to make retrospective adjustment in cases where you or your agent withhold or fail to provide information that may affect your site area charging band.

B3.4 Reductions in surface water drainage charges

Where the non-household customer can provide evidence to the sewerage undertaker's satisfaction that no surface water or ground water drains from their property into the public sewer, either directly or indirectly, subject to wholesaler policy they may not be liable for any charges for surface water drainage charges. This excludes discharges under a trade effluent agreement.

If a non-household customer can provide evidence to the sewerage undertaker's satisfaction that the chargeable area for which they are being charged is too large, they may be entitled to a reduction in their sewerage charge to reflect this. We will apply any such amendment in line with the Wholesaler decision. This reduced charge would typically take effect from the 1 April in the year in which the claim is made.

The wastewater undertaker may impose a charge for any inspection which takes place, in the event that a claim for a reduction in the drainage charge is unsuccessful and the current charge is found to be correct (see section B4).

The reduction in charge for a successful claim may be backdated in

certain circumstances as governed by Ofwat and the relevant laws.

Any claim must be submitted via phone or email (see contact details in section A1.7).

As set out in section B2.3.1 we reserve the right to recover from you or your agent any costs reasonably incurred in dealing with such a claim where we establish that the claim is not valid (see section B4).

B3.5 Compulsory metering

We require all non-household premises (as determined by Ofwat's eligibility guidance) to be measured where metering is practicable.

The cost of installing a water meter to a new water supply connection will be payable by the person requesting the supply (see section 148 of the act).

If a non-household customer transfers from a private water supply to a water supply provided by us, we will normally charge for water based on a water meter but may use an unmeasured or assessed volume charge, where a meter cannot be installed.

B3.6 New premises

All new premises must be capable of being separately measured and we may require you to meet the conditions set out in sections 47(2) and 64(3) of the Act before the connection is made, and we will recover costs as set out in section 45(6) of the Act.

For further details, see our website: water-plus.co.uk

B3.7 Requesting a meter

The occupier of any property receiving an unmeasured supply can, if after obtaining any necessary consents of third parties, ask us for a meter to be installed and for charges to be calculated on the basis of the volume of water supplied instead of rateable value. This meter will be installed in a location and manner approved by the water undertaker, and the charges applied will be the metered charges as described in section B2.

If the water undertaker considers that it is not reasonably practicable, or it would involve unreasonable expense, they may not install a meter. In such cases, including those where a shared meter agreement is not possible or appropriate, the occupier may opt to pay the appropriate assessed volume charges detailed in section B4 instead of a charge based on the rateable value of the premises.

We will accept requests for a meter made by email or telephone using the contact details in section A1.7.

B3.8 Ownership of the meter

Unless you have received permission and arranged for your own approved meter to be installed, the meter will remain the property of the water undertaker. Once the meter has been installed, if the occupier wishes to have it re-sited, we will arrange for the work to be carried out and there will be an additional charge (see section B4).

B3.9 Protection of and damage to the meter

The water undertaker owns and is responsible for the maintenance of the meter and any equipment associated with it.

You must take all reasonable care of the meter and must not cover or obstruct the meter in any way. You must allow us, our agents or the water undertaker reasonable access to your premises in order to access the meter. If a cost is incurred in accessing or re-siting the meter because you have covered or obstructed it, then we will charge you for these costs (see section B4).

It is a criminal offence under section 175 of the Act to interfere with, wilfully damage or remove the meter, i.e. you must not remove it or instruct anyone to remove it for you. If you are convicted of doing any of these actions, you could face a fine imposed by the Magistrates Court.

B4 Miscellaneous charges

Water Plus reserves the right to apply other charges to its customers outside of the standard charges set out in this scheme. These charges include, without limitation, interest, legal costs and other fees and charges for late payment and:

Late Payment Fees - Water Plus reserves the right to charge for late payment fees when payments are delayed, and the charges are not validly disputed in accordance with the terms and conditions of the contract between us. These amounts are set by late payment legislation and are as detailed below.

Amount of Debt	Late Payment Fee Amount
Up to £999.99	£40
£1,000 to £9,999.99	£70
£10,000 or more	£100

Non-Primary Services – Water Plus offers a range of services outside of the standard Water and Wastewater services, upon customer request. Whilst these services are arranged by Water Plus, often the work is carried out by the area wholesale providers, agents or companies acting on their behalf, or our behalf.

Examples include but are not limited to:

- Meter Relocation
- Meter Accuracy Testing (subject to terms)
- Conducting site surveys for the purpose of changing a site area banding

There are other services available upon request.

Whether the service is supplied by us or a third party, a reasonable administration charge will also be applied, which shall be payable upon request.

Full details can be found on our website, at: www.water-plus.co.uk
Value Added Tax will be added to each of the above services for all customers, including those with exemptions on other Water and Waste services.

C: Primary charges from 1 April 2025

C1 Introduction

This section of the document sets our water and sewerage charges from 1 April 2025.

From 2023 onwards, the charges applied to your site on a deemed contract will be different depending on the total level of consumption you use as a customer. Where you have multiple sites, the consumption for each of these sites will be added together for the purposes of defining customer group. The 3 customer groups are defined by usage between 0–500 m³, 500–50,000m³ and usage greater than 50,000m³ respectively. An additional retail fee will be applied to sites, detailed in table 1.

This retail element will be applied across all wholesale areas.

These charges are also often used in our express contracts with you as our basis for charging.

Table 1: Retail element

Customer usage group	<500m ³	500 – 50,000m ³	50,000m ³ +
Retail fee for water services (measured, unmeasured and assessed)	£56.52	£0.00	£0.00
Retail fee for waste water and drainage services (measured, unmeasured and assessed)	£56.52	£0.00	£0.00

In addition to the Retail element listed above, you will be charged a corresponding charge related to any Wholesale Charges applied in your respective region in line with the Retail Exit Code.
